

A healthier Africa

AFENET is committed to ensuring effective prevention and control of epidemics and other priority public health problems in Africa.

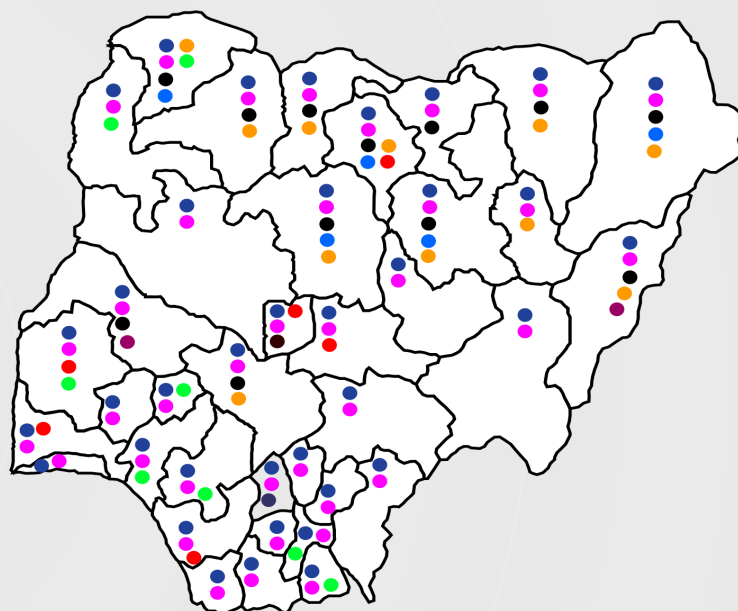

AFENET is a non-profit networking and service alliance of field epidemiology and laboratory training programmes and other applied epidemiology trainings in Africa.

AFENET Nigeria began operations in 2008 in Abuja. We work in partnership with the Government of Nigeria, donor agencies and implementing partners. With a one health and shared priority approach with funding partners, we boast of over a decades' experience in capacity building, health informatics, research and development, healthsecurity, risk and behaviour change communication, logistics and supply chain management, public health service delivery, fiduciary management, monitoring evaluation and learning that strengthens health interventions in the country.
